We are currently looking for a

New Product Introduction (NPI) Manager

Job Responsibilities

The new product introduction (NPI) manager is the Operations representative within the Core Team from the design phase of the project until the beginning of mass production.

- You interact with the key teams of manufacturing partners, including but not limited to engineering and test teams, to effectively and efficiently push for the manufacturing readiness for mass production.
- You plan the schedule and milestones with the concerned industrialization partner in alignment with the overall program plan.
- You plan and verify adequate materials/component management at every stage of NPI process (FGR, pilot, ramp-up).
- You own and support the NPI process by striving for continuous improvement on NPI process keeping in mind cost and yield optimizations, identifying and driving cost containment/reduction opportunities and driving drive the use of quality insurance tools and tests to ensure continuous quality improvement.
- You build up the long-term trust and partnership with the manufacturing partners.
- You provide inputs and assist with decisions to select manufacturing partners during the program initiation phases.
- You ensure the key project milestones are met and emerging issues are addressed in a timely and cost effective manner.
- You identify training needs and develop training plan on NPI process to core team members and manufacturing partner(s) to ensure to build up and strengthen NPI capability within the company and with the vendors.

Education

Degree or BTS in engineering.

Experience

- + 5 years experience

Recommended Technical Skills

- You are an industrial engineer with several years of experience ideally in a plant and/or with industrial Asian partners.
- You have a good knowledge on hardware, software, mechanics, logistics, quality and environmental.
- You react with agility to unplanned events - trigger/track action plans.
- You identify and track issues to closure.
- You challenge R&D and factory for optimization of process.
- You adapt your practices to regional specificities for better cooperation/coordination with others (= OPS-APAC, OPS-NAM, OPS-EMEA, different CEM, different manufacturing sites, ..
- You coordinate team work and are able to bring a cross-functional team together towards a common goal.
- You are comfortable in cooperating daily in projects with different R&D and business teams.
- You act as a team player without losing focus on the target project results.

Key competences

- You have a team spirit and are able to work in a multicultural environment.
- You are synthetic and creative.
- You are able to analyse deeply.
- You have strong experience in project management.
- You have good communication skills
- You are willing to travel regularly abroad, mainly to Asia.

Language

- English is mandatory.
- Dutch is a plus.

Location

Edegem (Antwerp), Belgium

Department: Connected Home, Operations
